Total Amount Payable: \$

- Blood Glucose Test Strips
- Insulin Pump Consumables
- Insulin Pump Cartridges/Reservoirs
- Urine Testing Strips

Access to continuous glucose monitoring (CGM) through the NDSS:

Subsidised access to CGM products is open to children and young people aged under 21 years, living with type 1 diabetes, who face significant challenges in managing their blood glucose levels.

To gain access to subsidised CGM products, the child or young person will need to be assessed by an authorised health professional to determine if they meet specific eligibility criteria.

The eligibility categories and criteria are listed on the Continuous Glucose Monitoring Eligibility Assessment form, available at www.ndss.com.au/cgm

A Continuous Glucose Monitoring Eligibility Assessment form cannot be accepted by an Access Point. It must be submitted as per the instructions on the form.

CGM sensors and transmitters can be ordered through the NDSS Access Points.

Sensors are available in boxes of four or five, and each sensor operates for six or seven days, depending on the model. Transmitters are supplied individually, and will operate for three months, six months or 12 months, depending on the model.

There is no copayment required for CGM products.

For more information or support, please call the NDSS Helpline on 1300 136 588.
